FRANCESCO CECCARELLI (ITALY)

Associate Professor of architectural history at the University of Bologna

Bruno Zevi Foundation

<https://www.fondazionebrunozevi.it/en/>

The purpose of the Foundation is to honour the memory of Bruno Zevi, a stubborn and impassioned advocate of the integration of democratic values and architectural ideas, and to recall his extraordinary work as a critic, historian and thinker. To this end, the Foundation encourages and furthers the activities of those wishing to devote their energies to the history of architecture, to theoretical studies and practical endeavors in the fields of architecture, city planning and landscape architecture, and to art in general. With particular reference to the youth, it also tries to foster an understanding of the architectural heritage as inseparably bound up with the literary and scientific heritage in accordance with the unified and decidedly anti-academic view of culture that Bruno Zevi championed throughout his life.

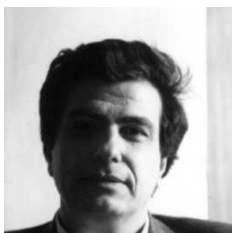

PAOLO CUCCHI (MALAYSIA)

Founder of PCA-Paolo Cucchi Architects

<https://www.paolocucchiarchitect.com/>

CA-PaoloCucchiArchitects is a multi-disciplinary international architectural practice established in 1987. Paolo Cucchi is the founding principal and design director. Primary commitment is to produce architecture of quality, with attention to details and exploration of materials. Architecture conceptually innovative, functional, concerned of context and sustainability, that resonates with the specificity of place and purpose. Based in Malaysia and Italy, the firm operates at different levels: the project types vary from private residences, offices to apartment towers, condominiums, public buildings and urban planning, embracing interior design, reuse and preservation.

GIUSEPPE LONGHI (ITALY)

Laurea onoris causa in architecture from UACEG Sofia

http://bamconf.org/wp-content/uploads/2012/05/glonghi_curriculum.pdf

His topic of teaching activities in the last years was sustainability, in the course of Urban Planning at laurea magistralis in "Architecture for sustainability" and in the scientific management of the master in "Sustainable urban project". The aims of these activities are developing projects: saving resources, thinking to the future, working in shared way; organized in net according with Local Agenda 21 principles; with principles according to topics and objectives of main international conventions. These activities are carried on according to "lifelong learning" principles, supported by the interactive platform www2iuav.it/moodle, in synergy with international net managed by Technical University of Barcelona (UNESCO Chair in 16 sustainability), Ateliers de Cergy-Paris and Urban-Challenge international net.

MURAT TABANLIOĞLU (TURKEY)

Founder of Tabanlıoğlu Architects

<http://www.tabanlioglu.com/>

Tabanlıoğlu Architects is established in 1990 by Murat Tabanlıoğlu and his father Hayati Tabanlıoğlu, and Melkan Gürsel (AIA Int.) joined the group as partner in 1995. İstanbul-based architectural firm, with its long family tradition since 1950, started with Dr. Hayati Tabanlıoğlu, architect of Çankaya Mosque, Erzurum Atatürk University, Atatürk Cultural Center, İstanbul Atatürk Airport and Galleria 'the first shopping mall of Turkey'. Spanning over six decades, the office demonstrates professionalism based on rigor and know-how. Tabanlıoğlu Architects develop innovative, yet efficient and economically viable design alternatives for residential buildings, offices, industrial facilities, shopping malls and transformation projects considering the uniqueness of the "place" and the individuality of "requirements".

**THOMAS HERZOG (GERMANY)**

Thomas Herzog Architekten

<http://thomasherzogarchitekten.de/>

Thomas Herzog is a German architect from Munich known for his focus on climate and energy use through the use of technologically advanced architectural skins. He began with an interest in pneumatics and became Germany's youngest architecture professor at the age of 32. He established his firm Herzog + Partner in 1983.

**RICHARD ENGLAND (MALTA)**

<http://www.richardengland.com/>

The architecture of Richard England occupies a particular niche in the broader history of Mediterranean Modernism. His work blends traditional Maltese typologies with the memories of centuries of architecture from the vernacular through to the classical, and into the strange, dreamlike, painterly and literary works of De Chirico and Calvino. England's influences ranges through music, art and literature: all the arts feed into a body of work which embraces drawing, sculpture and poetry as well as architecture and design.

**VAKHTANG DAVITAIA (GEORGIA)**

<http://vakhtangdavitaia.ge/>

Visiting Professor of the International Academy of Architecture, Bulgaria; Lecturer at the Graduate School Of Public Policy, Meiji University, Tokyo; Former Mayor of Minato City, Tokyo

**MICHAEL JOHNSON (USA)****Michael P Johnson Design Studio**<https://www.mpjstudio.com/>

The approach of Michael P. Johnson's work exemplifies remarkable qualities which rank it among the most valuable paradigms of contemporary architecture. Notwithstanding the climate of corporate America which has overwhelmed the architectural profession, Michael remains one of the "endangered species" in the field; he is one of the last representatives of artists who have never drawn a line between their life and work, who practice architecture on strong ethical codes and personal convictions. Michael's alternative approach results in buildings which magnetize engross and entertain us. His tender care for the subtle environments he creates, juxtaposed with the intense use of simple materials and methods, produces an architecture that naturally defies trends and serves its purpose. His buildings are highly interactive, as all conventional boundaries of space are reinterpreted in light of innovation, comfort and awareness. They engage us with passion, make us move about, look, sometimes frown in curiosity and amazement, but always leaving us with an elevated sense of enclosure in his architecture; we are constantly tantalized by the careful planning of the "hard elements" of the building (the walls, the partitions, the furniture) while we are placed in perpetual motion between near and distant views, enhanced by the reverberation of the quality of craftsmanship in the hard elements themselves.

**ARIS GEORGES (USA)****Founder of OM Studio**<https://www.houzz.com/projects/1657221/om-studio-design>

Aris Georges is the custom home design professional behind the mid-century modern-inspired houses in the OM Studio home design portfolio. He works with clients, architects and Lindal representatives to bring the homeowner's vision to life in a custom-designed modern home.

Georges founded OM Studio to further develop the home design principles he practiced and taught for over 20 years at the School of Architecture at Taliesin (formerly known as the Frank Lloyd Wright School of Architecture). Rooted in the organic principles of mid-century modern designs, Georges' spacious and elegant homes offer a fresh take on the classic aesthetic. All the OM Studio designs for Lindal use the flexible and efficient Lindal Elements building system.
